[inputs]
Small LM
Speculation Engine
Output 0: machine learning algorithm
Output 1: machine learning system design
Output 2: machine translation model
machine
learning
algorithm
system → design
translation → model
Speculated Token Tree
Synchronization
Linearization
Verification Engine
Verified output: machine learning system optimization
Verified Subtree
machine
learning
algorithm
system → optimization
translation → model
[inputs] → machine → learning → system translation
Parallel Decoding
LLM
Outputs: machine learning system optimization model
Incremental Decoding Based Inference Engine
Iterations:
[inputs]
machine
learning
system
0
1
2
3
LLM
Outputs:
machine
learning
system
