Tree-based Speculator (§3)

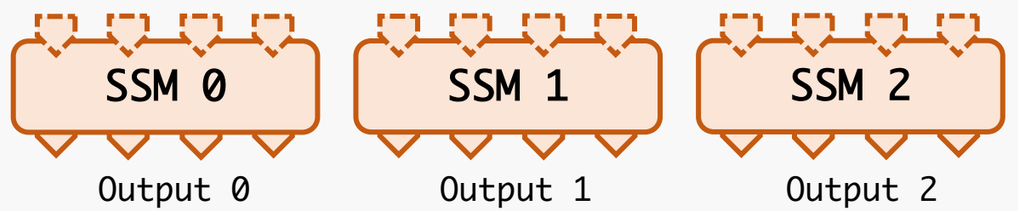

[inputs]

Expansion-based Token Tree Construction

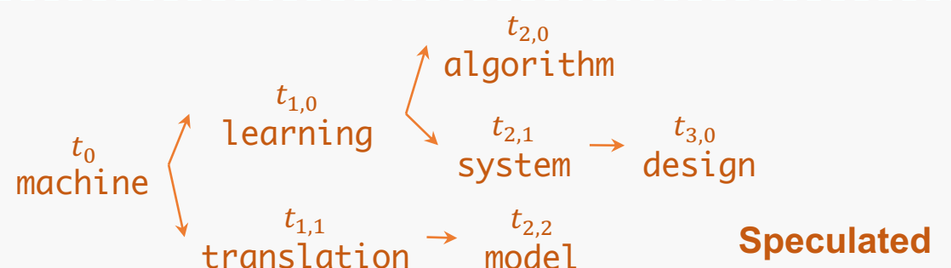

OR

Merge-based Token Tree Construction

Output 0: [machine] learning algorithm
Output 1: [machine] learning system design
Output 2: [machine] translation model

Sequence Representation of Speculated Tokens

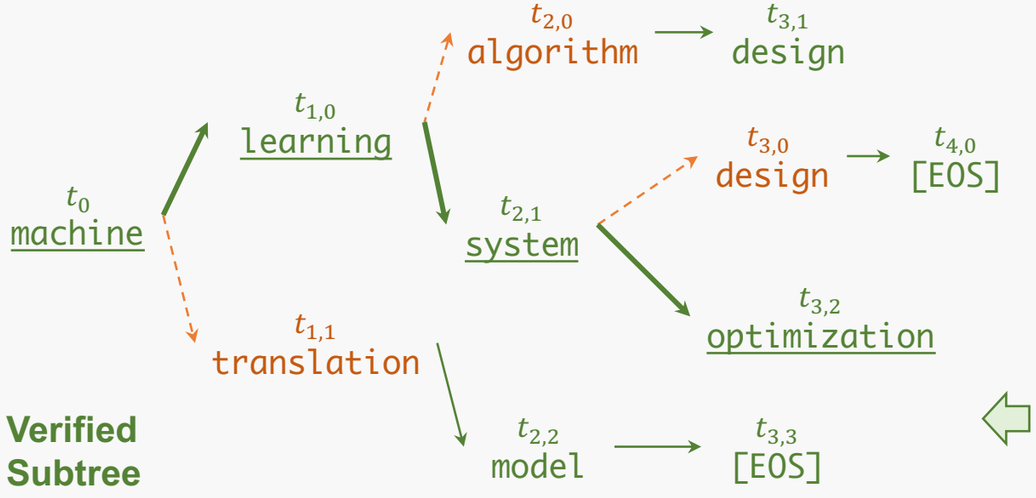

Speculated Token Tree

Verified output: machine learning system optimization

Synchronization

Linearization

Token Tree Verifier (§4)

Verified Subtree

[machine]→learning→algorithm system→design translation→model

Tree-based Parallel Decoding
